

LET'S FIX THE CATS! LOW COST!

YOU CAN FIX FRIENDLY CATS. YOU CAN FIX OUTDOOR CATS WHO RUN AWAY FROM YOU.

If all the cats are fixed, no more kittens will be born! You can borrow humane traps for shy cats. Low-cost spay/neuter is available for cats in your yard. This is called TNR, or Trap-Neuter-Return—stray cats in our neighborhoods are fixed and returned.

Call PALO ALTO HUMANE SOCIETY (PAHS) at (650) 424-1901 to learn how YOU can fix all the cats in your homes and yards and neighborhood. *Se habla español.*

Why can't the cats just be taken away?

- There is no place for the outdoor cats to be moved to.
- They can't be adopted because they are shy. But they are great for keeping mice out of your yard.
- If they are taken away, more new cats will move in.

What can I do?

When you see cats, look at their EARS. If you see an ear cut straight at the tip or a V-shaped notch in the side of the ear, it means the cat has already been spayed or neutered. If you do not see either of these marks, it means the cat needs to be fixed. Call PAHS at (650) 424-1901 for information.

Why should I bother?

- Getting the cats spayed/neutered means there will be fewer cats and no more kittens! Kittens born outside get very sick, starve, and die. It is much better for all the cats to be fixed so they don't have kittens.
- Fighting, yowling, and the smell of "tomcat" urine are greatly reduced. The cats become better neighbors!
- TNR (Trap-Neuter-Return) is the only thing that works.
- You will feel good about reducing the suffering of these animals.

Should I feed these cats?

Yes, you should feed them because, otherwise, they will get sick. Feeding them helps you catch them to get them fixed.

**LET'S WORK TOGETHER TO GET ALL OUR NEIGHBORHOOD CATS FIXED.
THE PEOPLE AND THE ANIMALS WILL BE HAPPIER,
AND NO MORE KITTENS WILL BE BORN.**
